

Keeping your child's iPad updated

It is essential for your child's learning that their iPad be kept up to date.

With out of date software your child may be unable to use their iPad in class as certain Apps require the latest software to work.

Fortunately it is an easy process to keep the iPad updated, and this guide will briefly take you through how to update your iPad to the latest software, and also how to enable "Automatic Updates" for any required Apps.

Updating the system software

Apple is constantly upgrading the iPad system software and adding new features to use. These updates are freely provided but must be manually updated.

Follow the below instructions to update your device:

- 1) Plug in your device to a power source.
- 2) Tap Settings > General > Software Update.
- 3) Tap "Download and Install" to download the update.
- 4) Tap "Install" when the download completes. If your device is passcode enabled, it will ask you to enter the passcode before installing the update.
